

SimpliPhi Battery Energy Storage System

Power on your terms. On or off the grid. The SimpliPhi Battery Energy Storage System (BESS) is an advanced, safety-certified system available for your business. The system is built with a 6kW inverter and the 4.9 kWh Battery, which leverages the Lithium Ferro Phosphate (LFP) lithium-ion chemistry to deliver advanced-level power storage while running longer and safer. Innovative modular technology allows the system to independently scale power and energy storage capacity to meet your needs. From providing primary power to a business, or simply holding power for times of outage, configure your system for true energy independence, peace of mind and reliable performance for real energy savings.

Modular for any installation

Add batteries for longer-duration storage for multiple days of outages, or manage a smaller battery bank for minimal essential load backup and Time-of-Use (TOU).

Sized for your needs

Separate components allow you to right-size a system to meet your needs, rather than being boxed into a pre-configured system.

Control wherever, whenever you need it

EnergyTrak™ Control System monitors your energy and gives you peace of mind that your system is doing its job.

Versatile installation options

IP65 rating supports all weather conditions for both indoor or outdoor installations.

Maintenance-free

No ventilation, cooling or thermal regulation required; 10-year warranty.

Leading safety-tested system

High performance tested with batteries carrying UL 9540 certification.

One-call support

Vertical integration simplifies installation, compatibility and technical support.
